The Center of Excellence for Software, Systems and Logistics Engineering Resources

Epoch Software Systems, Inc.

Born within the heart of "Silicon Valley" in 1984, Epoch Software Systems, Inc. is a small minority woman-owned business with offices in California, Florida, and Georgia. We provide our clients, both Defense and Commercial, a high level of expertise in solving very challenging Software and Systems Engineering problems utilizing the latest in technology and the highest level of engineering expertise.

Defense Engineering Services

Over the last 18 years, Epoch has been supporting the U.S. Military and the Department of Defense in the areas of Electronic Warfare (EW), Image Intelligence (IMINT), and Signal Intelligence (SIGINT) on a multitude of computer systems and intelligence gathering platforms.
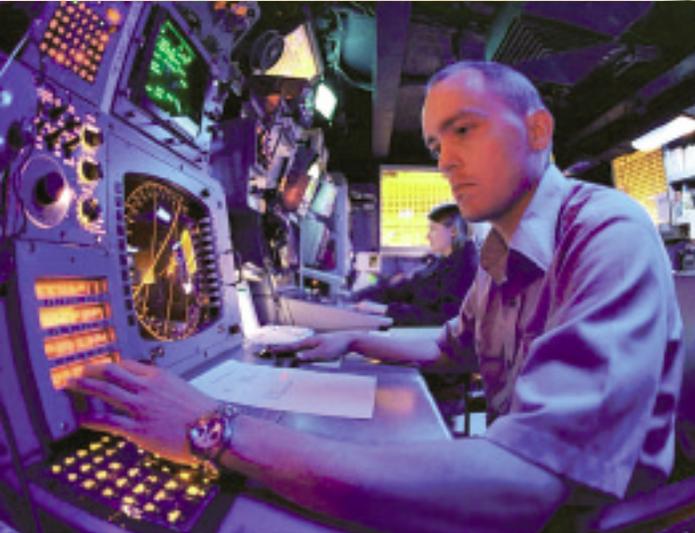

These ground, air, water, and space-based systems have been invaluable in the support of our military and ultimately in the defense of our Country. Some of the high profile systems Epoch has supported over the years include:

♦ Guardrail Common Sensor
♦ Contingent Airborne Reconnaissance System
♦ Bradley Fighting Vehicle
♦ USAF F-15 Flight Program
♦ Satellite Control System
♦ Trackwolfe / Trackfinder

Commercial Engineering Services

Utilizing the precise engineering development techniques gained by the years within the Defense arena, Epoch has also developed many different database, web, and business management applications for our commercial clients. Some of these applications include:

♦ Legal Case Management
♦ Resume' Tracking
♦ Reservation System
♦ Client Contact & Management

Software Engineering

With an employee average of over 15 years of experience, Epoch's Software Engineers play key roles in the software design and development process utilizing the latest in Object Oriented Analysis and Design techniques. Our engineers possess not only the latest language and tools required for software development, but also those languages used on legacy systems. A few of those languages, tools and methodologies are listed below:

♦ JAVA	♦ C / C++	♦ Ada
♦ FORTRAN	♦ Assembly	♦ HTML
♦ Cold Fusion	♦ Flash	♦ DHTML
♦ X-Windows Motif	♦ Visual Basic	♦ OpenLook
♦ Sybase Tools	♦ Oracle Tools	♦ MS Access
♦ Rational Rose	♦ Cadre Teamwork	♦ Clearcase

Systems Engineering

Starting from the initial concept all the way through final system integration, Epoch's System Engineers have a broad range of experience on both large and small projects. Epoch's state-of-the-art activity is geared towards sophisticated data gathering and processing systems. Our Systems Engineers have performed activities that include proposal support, system analysis, algorithm development, rapid prototyping, simulation, networking, integration, and vendor trade-off studies.

Our Commitment

Throughout our years in the business, Epoch has been built on the reputation of our people. Our Software and Systems Engineers have maintained a large and diverse skill-set through many years of engineering support and development for our clients. We employ only those people who possess the skills to perform not only on today's technologies, but also those who have the ability to enhance those skills to perform in the hi-tech environment of tomorrow.

Epoch's number one goal is to provide our clients with timely, affordable solutions supported by our commitment to quality. This has resulted to complete customer satisfaction which, for almost two decades, has contributed to our success.
